Getting Started with Audio Hijack

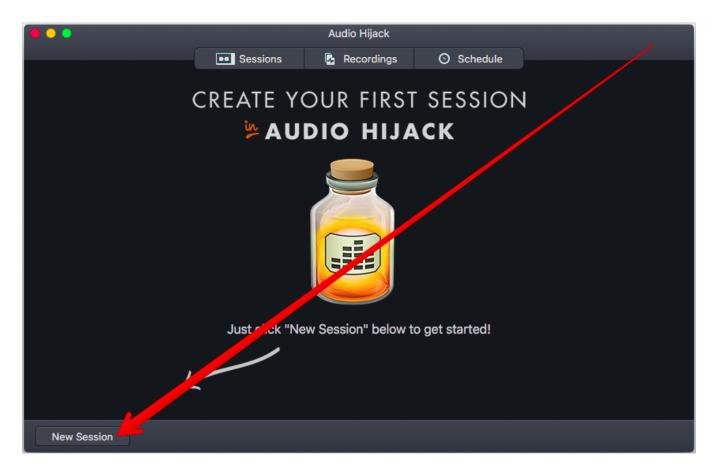

Audio Hijack is advanced software used for broadcasting and recording audio. It has many features that are covered in detail in their own guide. Our guide will focus on connecting Audio Hijack to your VosCast server. For more detailed information on all of the features of Audio Hijack, I recommend reading their manual inside of Audio Hijack, which is accessible through the menu bar by going to Help > Audio Hijack Manual.

1. Download and Install Audio Hijack.

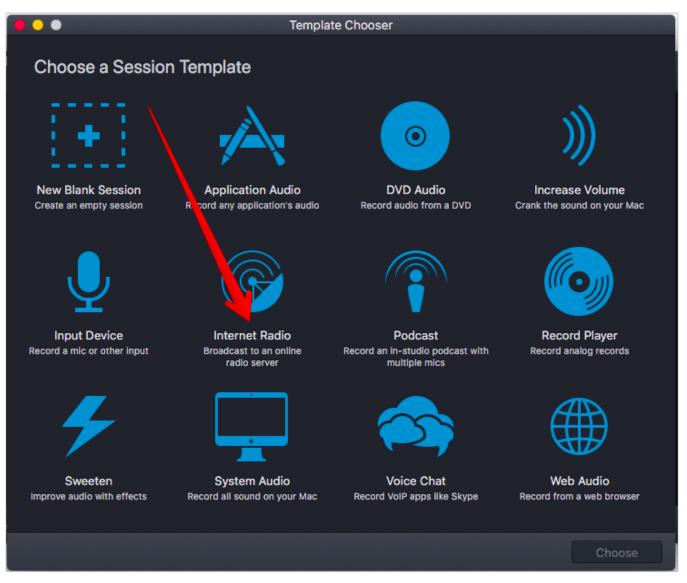

Audio Hijack is available on the Rogue Amoeba website: <u>https://rogueamoeba.com/audiohijack/</u>

2. Create a new session

You can do this by clicking the "New Session" button in the bottom-left corner of the Audio Hijack window.

3. Choose the "Internet Radio" session template.

a. Click "Broadcast", then go to "Metadata" and input your station details.

	Status	Broadcast	ON
Application VU Meters Tunes Broadcast Offline 0:00	Station Info Name: S URL: Y	Station Name Here Your Website URL Here Station Genre Here	
Input Device Peak/RMS -3dB- -3dB- -3dB- -3dB- -3dB- -18dB- -18dB- -48dB-		Track Title) - (Artist) Arright - Artist Arright - Arright - Arrig	•
0:00 Stopped iTunes + Internal	I Mic to 2 outputs		METERS

4. Enter your server details

a. Go to the "Setup" tab and set the server type as "Shoutcast 2"

b. Leave the "User" field empty.

c. Enter the server details found in the VosCast client area, on the "Account Overview" page.

d. Set the "Station ID" as "1".

e. Change the bitrate to the maximum bitrate of the VosCast plan you selected. You can find this in the client area as well, if you cannot remember the bitrate of your plan.

		Broadcast	ON	
	Status	Metadata	Setup

O:00 Stopped iTunes + Internal	Mic to 2 outputs	Recordi	o :≡ ngs Schedule Hide Library	

5. Begin Broadcasting

To begin broadcasting, simply click the "Record" button in the bottom-left corner of the Audio Hijack window.
