

# Using SHOUTcast

## What's my username and password for the admin section of my server?

Your username is "admin", you can find the password in the client area in the SHOUTcast Server Settings page under "Administrator Password".

The screenshot shows a section of the SHOUTcast interface with a grey background. It contains four rows of settings:

- Version: (?)**: A dropdown menu showing "SHOUTcast DNAS 1.9.8".
- Server Password: (?)**: A text input field.
- Administrator Password: (?)**: A text input field with a yellow "Change" button to its right.
- Title Format: (?)**: A text input field.

For our administration purposes, we require this password to be randomly generated.
